DETAILED ACTION

1. Applicant's arguments with respect to amended claims 1-4, 7, 9 and new claims 17-19 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 1-4, 7, 9 and 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fencl et al. (US 5,817,276) in view of JP 2001-153,386 A, both references cited in the last Office action. Fencl's invention is directed to an air conditioning system with UV light source for removing odor. Fencl discloses in Fig. 7 an embodiment wherein the air conditioning system comprises first and second evaporators coils, each having a drain pan positioned below; a first UV light source positioned and oriented to direct UV light onto at least one surface of the first evaporator coil; and a second UV light source positioned and oriented to direct UV light onto at least one surface of the second evaporator coil. Fencl also discloses in Fig. 7 the limitation of the evaporator coils between the first and second UV light sources as claimed in claim 17. The differences between Fencl and the above claims are the recited provisions of a substrate disposed downstream from the first and

Application/Control Number: 10/723,637

Art Unit: 1753

Page 3

'386 shows in air conditioning system with UV light source for removing odor the provision of a substrate 3a disposed downstream from a heat exchanger 2 (an evaporative coil) and a photocatalyst 3c on at least one surface of the substrate 3a, wherein an UV light source is positioned and oriented to direct UV light onto at least one surface of the heat

second evaporative coils and a photocatalyst on at least one surface of the substrate. JP

exchanger and on the photocatalyst on the at least one surface of the substrate (Fig. 3;

paragraphs [0006] and [0048]-[0052]). The subject matter as a whole would have been

obvious to one having ordinary skill in the art at the time the invention was made to have

modified Fencl as suggested by JP '386 because this would result in the use of a

photocatalyst in removing odor in combination with both surface and air sterilization by an

UV light source.

Response to Arguments

4. Applicant's arguments filed 10 November 2006 have been fully considered but they are not persuasive because of the new ground of rejection as set forth in the paragraphs above.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP

Art Unit: 1753

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kishor Mayekar whose telephone number is (571) 272-1339. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam Nguyen can be reached on (571) 272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information
